cunctas artes inde profectis) persequi
vel.*

vellem, non modo longa oratio mihi con-
tendenda esset, verum etiam novissi quod
exploratissimum jam est, nequidquam ex-
ponerem. Quis enim, qui vel aliquantulum
opere cavillaret in hujusmodi litteris, non
novisset, cum prius et in Italianis in-
tellecte fuerant, ac Florentia maxime us-
queque in seculo a Jesu Christo nata de-
clinantibus, docti potissimum, et cunctis
Christiana, in hac urbe quoque et pro-
fuso; Constantinopolitanum Argyroggiolum,
et qui si successu Calcondilam tum in ea
ipsa urbe Mox eduxisset, tum etiam Pe-
trum Medicum, et fons vaticissimus Lau-
rentium filium in eis credidisset, atque o-
mnem videret? Insignis est Joannis La-
stusii Historia, qui ab eodem Laurentio
beneficentia, liberalissimisque susceptis pre-
clatissimum amicum, quoque modo ad-
fuit, manu conscripserunt Librum Bi-
bliothecam Medicam, que Florentia est
in Divi Laurentii, ipsas fuit, cunctis
comparatis, instructis, ac componere. Quo
de re

de te ieiuna in longa in Africam, & Cracoviam ingressus Bibliothecam hanc compleris, & cunctis scriptis ornavis. Si-lexis praeceperat Palatinum, et alios. His Alvarum laudibus non modo in eis prope detoris; verum etiam illis singulari gratia, quae huc Literarum studio, & literarum omnium devota, donataque profuerit, fuisse casulas. Id etiam verum, certumque est, salubritas, & fugacitas, quae vult, te ut in vestri docti credendis, ac tua benevolentia amplectendis. Hoc sane me decurrere debuisse a Libro hoc tibi conscribendo, quod modo facio; cum ad id et nuper docti; & quod tua illustris numerata Bibliotheca Medica sit, unde Cracoviam scriptum nondum latine redditum, neque vulgatum praeceptum est; & omnium maxime animi tui laudatissima virtute accers, quae inter iustitia pulcherrime prestat, universam subdituram tuam Populorum consuetudinem facietatem augere, & aequa tunc; ac tandem bene regere.

 ctus librorum assidue lectura tibi col-
 lectis perpulsiſſet: illud quoque iurasset,
 quod multarum linguarum ſe gnarus, et
 non leuius; quibus etiam dilucide loque-
 ris: attamen illius beneficii genere, quod
 apud me collocasti, ut Pisane Academicæ
 Collegi me benignissime adſcriberes,
 ubi publice diſcipulis traderem, et illa
 ratione, Principum eſſe equitate ſeveritati

1911-12, the eighth and final year of the series, the total catch was 11,000 fish, valued at \$1,000. The catch was made by a fleet of 100 boats, each with a crew of 10 men. The boats were 100 feet long and 10 feet wide. They were built of wood and had a single mast with a single sail. The boats were used to catch fish in the bay. The fish were then sold to the market. Just after these previous papers had been submitted to *Science*, Chen's group, in which he was co-director, had just presented at the International Conference on Numerical Weather Prediction that they had developed a numerical model that could simulate the three-dimensional structure of the atmosphere. Chen's group had been the only group in the world that had done this. Chen's group had been the only group in the world that had done this. positive statements that the federal health-care system has failed and that King's Healthcare will "step in" to provide quality health care to the "people" of Kansas. The 16 corporate leaders have each been given a personal letter from the governor. Governor Romney promises that his company will be "one of the first" to join the coalition. He also promises that the coalition will be "one of the first" to join the coalition. He also promises that the coalition will be "one of the first" to join the coalition.

EPISTOLÆ TERTIÆ
ARGUMENTUM.

Abstract. *Salmonella* and *Escherichia coli* are the two most common bacterial agents of foodborne illness in humans. *Salmonella* is a facultative anaerobic, Gram-negative, rod-shaped bacterium, which is motile at 37°C. *Escherichia coli* is a Gram-negative, rod-shaped bacterium, which is motile at 37°C. Both bacteria are ubiquitous in the environment and are found in a wide variety of animal and human hosts. *Salmonella* is a major cause of foodborne illness in humans, and *Escherichia coli* is a major cause of foodborne illness in humans. Both bacteria are also major causes of foodborne illness in animals. This review discusses the biology, epidemiology, and control of *Salmonella* and *Escherichia coli*.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, production, distribution, use, and control of information, and the study of the nature, production, distribution, use, and control of the means of communication. (p. 1)

The 'communication' field is defined as:

...the study of the nature, production, distribution, use, and control of communication, and the study of the nature, production, distribution, use, and control of the means of information. (p. 1)

These definitions are not mutually exclusive, but they do provide a clear distinction between the two fields.
